

## PRODUCT NOTICE

### ■ Change of ATD\* Membrane Modules

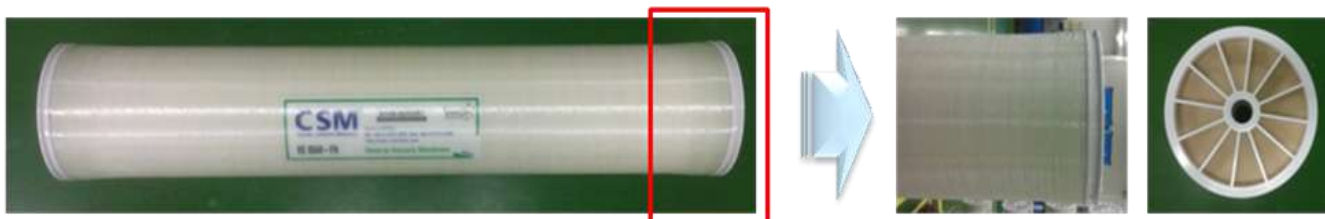

Aug. 24, 2012

CSM (Woongjin Chemical Co., Ltd) would like to announce a minor change in our ATD's for the entire 8-inch product line.

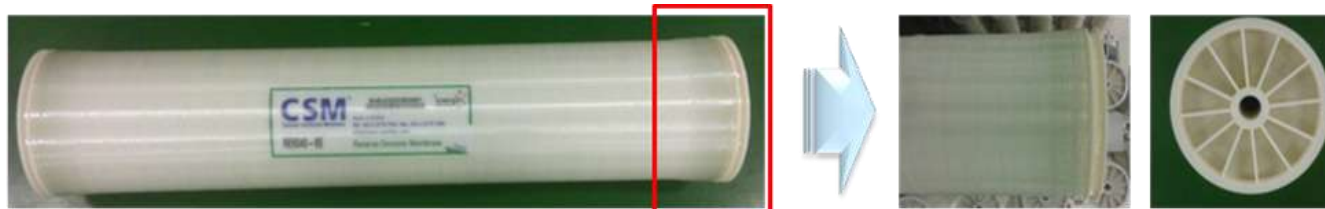

Due to the color difference between FRP wrapping and ATD, CSM had changed the color of the ATD's from a pure white into a natural ivory in order to unify the color of the entire module.

Please note that there is no change in the performance of the membranes.

Old End-cap with White Color

New End-cap with Ivory Color

Thank you for your continued support.
